Performance Management Agent

CAI Score L3 · Operate — Bounded autonomy

▲ this agent

L1 Assist	L2 Draft	L3 Operate	L4 Decide	L5 Autonomous
TIER	PILLAR	AUTOMATION	HUMAN ROLE	
L3 · Operate	Corporate	≈60% of routine effort	Owns exceptions and oversight	

01 — Executive summary

Performance Management Agent is a CAI Score L3 (Operate) agent for corporate. Supports managers in performance management, helping structure reviews and keep feedback consistent across teams. It operates with bounded autonomy: a person owns exceptions and retains workflow oversight. Indicatively, it can redirect around 60% of the routine effort this work consumes.

02 — Problem & context

- Review quality swings wildly depending on the manager.
- Managers reinvent the structure of every review from scratch.

03 — Representative use cases

- Guides managers through the review structure, ensuring all required elements are addressed consistently.
- Surfaces relevant performance data and prior feedback for the manager before each review conversation.
- Reduces the time managers spend preparing for reviews by providing a structured starting point.
- Improves review quality consistency across the organisation by standardising the process, not the outcome.
- Produces the evidence to track review completion rates, feedback quality scores, and manager-consistency metrics.

04 — How to use it

- 1 Connect it in your tenant to the systems this work already touches (people team (hr)).
- 2 Confirm scope, the named owner, and the oversight the tier requires.
- 3 Detects the trigger in the workflow
- 4 Handles routine in-policy cases end to end
- 5 Escalates exceptions to the owner
- 6 Logs every action for audit
- 7 Review the audit log and KPI movement after each cycle; tune scope as you learn.

05 — Where it fits in the process

Sits inside the performance cycle — helping managers structure reviews and feedback so quality is consistent across the organisation.

Operating loop for a L3 agent — bounded autonomy.

06 — Risk assessment

#	RISK	LIKELIHOOD	IMPACT	MITIGATION / CONTROL
1	Incorrect or incomplete output	Medium	Medium	Routine cases only; exceptions and anything material are escalated to the named owner, with a full audit trail.
2	Over-reliance / reduced human scrutiny	Medium	Medium	Tier oversight keeps a human in the loop; KPIs monitor quality so reliance never outruns control.
3	Exposure of sensitive data	Medium	Medium	Runs inside your own tenant; Colleague AI processes none of your data, and access stays under your existing controls.
4	Behavioural drift over time	Medium	Low	Periodic review against KPIs and sampling detects drift; scope and prompts are version-controlled.
5	Out-of-policy or edge-case handling	Medium	Medium	Scope is bounded and documented; anything outside it is escalated, not improvised.

Residual likelihood × impact after the tier's built-in controls. Numbers map to the table above.

07 — Regulatory & compliance impact

FRAMEWORK	RELEVANCE	HOW THIS AGENT ALIGNS
EU AI Act	Operational use under human oversight; logging and risk-tiering apply.	Documented risk tier, human oversight and event logging per agent — designed to map to the obligations.
DORA	Relevant where the function is in scope for financial-sector operational resilience.	Actions are logged and attributable, supporting resilience and traceability requirements — designed to map to.
GDPR	Applies wherever personal data is in scope of the workflow.	Data stays in your tenant; Colleague AI processes none of it. Purpose limitation and minimisation are preserved.
ISO/IEC 42001	AI management-system controls: roles, monitoring, review.	The agent operates within a documented management system — defined tier, named roles, logging and review. Designed to meet; not certified.

“Designed to map to” / “designed to meet” describe alignment with the CAI Score framework, not external certification. Confirm obligations with your compliance function.

08 — Value & illustrative ROI

Supports managers in performance management, helping structure reviews and keep feedback consistent across teams.

Assumptions (illustrative — replace with your own)	Result
6 FTE engaged · 1840 productive h/FTE/yr · 60% addressable · €55/h blended	≈ 6,624 hours/yr redirected · ≈ €364,000/yr indicative value

Figures are an illustrative model to be validated against your own volumes and rates – not a guarantee.

KPIs to track

Improved management consistency.

09 — Recommendations

- Load the performance management framework and review structure into the agent before deployment.
- Managers own every assessment and decision — the agent structures and supports, it does not evaluate.
- Sensitive performance context stays with the manager and People Ops; the agent does not retain it.
- Review review-quality scores and completion rates after the first full cycle.

10 — Governance & method

This agent runs in your own Microsoft/Azure tenant; Colleague AI hosts only the control plane (score, policy, audit) and processes none of your data. A person owns exceptions and retains workflow oversight. Every action is time-stamped and attributable. The CAI Score classification is documented and open to challenge.
