Signing Summary Agent

CAI Score L3 · Operate — Bounded autonomy

▲ this agent

L1 Assist	L2 Draft	L3 Operate	L4 Decide	L5 Autonomous
TIER	PILLAR	AUTOMATION	HUMAN ROLE	
L3 · Operate	Corporate	≈60% of routine effort	Owns exceptions and oversight	

01 — Executive summary

Signing Summary Agent is a CAI Score L3 (Operate) agent for corporate. Prepares signing summaries ahead of execution, so signatories see the key points without reading the full document. It operates with bounded autonomy: a person owns exceptions and retains workflow oversight. Indicatively, it can redirect around 60% of the routine effort this work consumes.

02 — Problem & context

- Signatories either read the whole document or sign without reading it.
- Execution stalls while someone prepares a plain-language brief.

03 — Representative use cases

- Produces a concise, plain-language signing summary from the contract for each signatory.
- Reduces the risk of uninformed signing by making key terms immediately visible.
- Eliminates the execution delay caused by manual brief preparation.
- Provides consistent signing summaries across all contracts, improving signatory confidence.
- Produces the evidence to track signing cycle time, summary accuracy, and signatory feedback.

04 — How to use it

- 1 Connect it in your tenant to the systems this work already touches (legal).
- 2 Confirm scope, the named owner, and the oversight the tier requires.
- 3 Detects the trigger in the workflow
- 4 Handles routine in-policy cases end to end
- 5 Escalates exceptions to the owner
- 6 Logs every action for audit
- 7 Review the audit log and KPI movement after each cycle; tune scope as you learn.

05 — Where it fits in the process

Sits just before execution — giving signatories a concise view of the key terms so they sign informed, faster.

Operating loop for a L3 agent – bounded autonomy.

06 — Risk assessment

#	RISK	LIKELIHOOD	IMPACT	MITIGATION / CONTROL
1	Incorrect or incomplete output	Medium	Medium	Routine cases only; exceptions and anything material are escalated to the named owner, with a full audit trail.
2	Over-reliance / reduced human scrutiny	Medium	Medium	Tier oversight keeps a human in the loop; KPIs monitor quality so reliance never outruns control.
3	Exposure of sensitive data	Medium	Medium	Runs inside your own tenant; Colleague AI processes none of your data, and access stays under your existing controls.
4	Behavioural drift over time	Medium	Low	Periodic review against KPIs and sampling detects drift; scope and prompts are version-controlled.
5	Out-of-policy or edge-case handling	Medium	Medium	Scope is bounded and documented; anything outside it is escalated, not improvised.

Residual likelihood × impact after the tier's built-in controls. Numbers map to the table above.

07 — Regulatory & compliance impact

FRAMEWORK	RELEVANCE	HOW THIS AGENT ALIGNS
EU AI Act	Operational use under human oversight; logging and risk-tiering apply.	Documented risk tier, human oversight and event logging per agent — designed to map to the obligations.
DORA	Relevant where the function is in scope for financial-sector operational resilience.	Actions are logged and attributable, supporting resilience and traceability requirements — designed to map to.
GDPR	Applies wherever personal data is in scope of the workflow.	Data stays in your tenant; Colleague AI processes none of it. Purpose limitation and minimisation are preserved.
ISO/IEC 42001	AI management-system controls: roles, monitoring, review.	The agent operates within a documented management system — defined tier, named roles, logging and review. Designed to meet; not certified.

“Designed to map to” / “designed to meet” describe alignment with the CAI Score framework, not external certification. Confirm obligations with your compliance function.

08 — Value & illustrative ROI

Prepares signing summaries ahead of execution, so signatories see the key points without reading the full document.

Assumptions (illustrative — replace with your own)	Result
3 FTE engaged · 1840 productive h/FTE/yr · 60% addressable · €60/h blended	≈ 3,312 hours/yr redirected · ≈ €199,000/yr indicative value

Figures are an illustrative model to be validated against your own volumes and rates – not a guarantee.

KPIs to track

Improved efficiency at the signing stage.

09 — Recommendations

- Connect the agent to the contract management system before deployment.
- The signatory and legal team remain responsible for the executed document — the agent summarises, it does not advise.
- Review summary accuracy against the underlying contract for the first 10 executions.
- Baseline signing cycle time before go-live.

10 — Governance & method

This agent runs in your own Microsoft/Azure tenant; Colleague AI hosts only the control plane (score, policy, audit) and processes none of your data. A person owns exceptions and retains workflow oversight. Every action is time-stamped and attributable. The CAI Score classification is documented and open to challenge.
