Pipeline Reporting Agent

CAI Score L2 · Draft — Human reviews & approves all output

▲ this agent

L1 Assist	L2 Draft	L3 Operate	L4 Decide	L5 Autonomous
TIER	PILLAR	AUTOMATION	HUMAN ROLE	
L2 · Draft	Sales & Marketing	≈60% of routine effort	Reviews and approves all output	

01 — Executive summary

Pipeline Reporting Agent is a CAI Score L2 (Draft) agent for sales & marketing. Automates pipeline reporting and status updates so managers always have a current, accurate view without manual roll-ups. It operates with a human review gate: all output is approved before use. Indicatively, it can redirect around 60% of the routine effort this work consumes.

02 — Problem & context

- Managers chase reps for status to hand-build a roll-up each week.
- By the time the pipeline report is ready, it is already out of date.

03 — Representative use cases

- Assembles the weekly pipeline report automatically from CRM data — no manual roll-up required.
- Keeps the pipeline view current in near-real time, eliminating the staleness of weekly-snapshot reporting.
- Provides consistent format and structure across all pipeline reports, enabling like-for-like comparison.
- Drafts pipeline-meeting briefings and variance commentary for managers to review and use.
- Produces the evidence to track pipeline accuracy, reporting effort saved, and forecast-to-actual variance.

04 — How to use it

- 1 Connect it in your tenant to the systems this work already touches (sales).
- 2 Confirm scope, the named reviewer, and the approval the tier requires.
- 3 Receives the task trigger or request
- 4 Produces the draft or analysis output
- 5 Human reviews and approves before use
- 6 Logs every output for audit
- 7 Review quality and acceptance rate after each cycle; tune scope as you learn.

05 — Where it fits in the process

Sits at the reporting layer — keeping the pipeline view current automatically so managers stop chasing roll-ups.

Drafting loop for a L2 agent — human approves all output.

06 — Risk assessment

#	RISK	LIKELIHOOD	IMPACT	MITIGATION / CONTROL
1	Incorrect or incomplete draft	Low	Medium	Draft is reviewed and approved by a human before any use; errors are caught at the review gate.
2	Over-reliance / reduced diligence	Low	Medium	Tier design keeps a human in the approval seat; acceptance-rate KPIs are tracked each cycle.
3	Exposure of sensitive data	Medium	Medium	Runs inside your own tenant; Colleague AI processes none of your data. Access stays under your existing controls.
4	Scope creep or misuse	Low	Low	Scope is bounded and documented; the agent produces output only — it takes no autonomous action.
5	Quality drift over time	Low	Low	Periodic sampling and KPI review detects drift; prompts are version-controlled and change-managed.

Residual likelihood × impact after the tier's built-in controls. Numbers map to the table above.

07 — Regulatory & compliance impact

FRAMEWORK	RELEVANCE	HOW THIS AGENT ALIGNS
EU AI Act	Operational use under human oversight; logging and risk-tiering apply.	Documented risk tier, human oversight and event logging per agent — designed to map to the obligations.
DORA	Relevant where the function is in scope for financial-sector operational resilience.	Actions are logged and attributable, supporting resilience and traceability requirements — designed to map to.
GDPR	Applies wherever personal data is in scope of the workflow.	Data stays in your tenant; Colleague AI processes none of it. Purpose limitation and minimisation are preserved.
ISO/IEC 42001	AI management-system controls: roles, monitoring, review.	The agent operates within a documented management system — defined tier, named roles, logging and review. Designed to meet; not certified.

“Designed to map to” / “designed to meet” describe alignment with the CAI Score framework, not external certification. Confirm obligations with your compliance function.

08 — Value & illustrative ROI

Automates pipeline reporting and status updates so managers always have a current, accurate view without manual roll-ups.

Assumptions (illustrative — replace with your own)	Result
3 FTE engaged · 1840 productive h/FTE/yr · 60% addressable · €55/h blended	≈ 3,312 hours/yr redirected · ≈ €182,000/yr indicative value

Figures are an illustrative model to be validated against your own volumes and rates – not a guarantee.

KPIs to track

Improved efficiency and accuracy of pipeline reporting.

09 — Recommendations

- Connect the agent to the CRM and all pipeline data sources before deployment.
- Managers review the assembled report before it is used for decisions — this is an L2 agent.
- Review report accuracy against the manual baseline in the first three weeks.
- Baseline report preparation time and pipeline accuracy before go-live.

10 — Governance & method

This agent runs in your own Microsoft/Azure tenant; Colleague AI hosts only the control plane (score, policy, audit) and processes none of your data. A person reviews and approves all output before it is used. Every action is time-stamped and attributable. The CAI Score classification is documented and open to challenge.
